\	Switch backlight mode
Enter	Switch color
↑	Increase brightness
↓	Decrease brightness
←	Slow down lighting speed
→	Speed up lighting speed

Enable/Disable ultra-low latency mode.

04 UNCS Battery Management

Check Battery Level

RGB version: Long-press the [FN+SPACE] combination keys, and the number keys 1-0 will display the battery percentage continuously. 1 represents 10%, 1-2 represents 20%, and so on, until 1-0 are all continuously lit, indicating 100% battery. When the battery is below 40%, it will display in red; below 80%, it will display in yellow; and above 80%, it will display in green.

Non-RGB version: Long-press the [FN+SPACE] combination keys, and the lights from ESC to F4 will display the battery percentage. ESC represents 20%, ESC and F1 represent 20%, and so on, until ESC-F4 are all continuously lit, indicating 100% battery. When the battery is below 40%, it will display in red; below 60%, it will display in yellow; and above 60%, it will display in green.

Charging Mode

Low battery alert: The ESC key will continuously flash red to indicate low battery until you connect it to a charging device.

Fully charged indication: The ESC key will flash green five times slowly to indicate that it is fully charged.

05 UNCS Mode setting and pairing

2.4GHz wireless connection.

- Battery switch in the plugged-in or wireless mode while in the "ON" position.
- Insert the 2.4GHz receiver into the computer's USB port.
- Use FN+TAB to switch to F4 blinking, and it will stay steadily lit when the connection is successful.

Bluetooth

- When in the plugged-in or wireless mode, the battery switch should be in the "ON" position.
- Use FN+TAB to switch to F1-F3 blinking, then long-press FN+F1/F2/F3 to initiate pairing (indicated by rapid flashing lights). The Bluetooth pairing names are "Rainy75-1," "Rainy75-2," and "Rainy75-3."
- Supports up to three devices; you can switch between them by pressing FN+F1/F2/F3.

Wired

- Insert the USB-C connection cable into the keyboard port.
- Connect the other end of the USB-C cable to the computer.
- Use FN+TAB to switch to the ESC indicator light, and a rotating light effect indicates a successful connection.

Other notes.

- When using the wired mode for an extended period, please switch the power switch to "OFF." Otherwise, when the switch is in the "ON" position, the keyboard will automatically switch to the 2.4GHz mode after disconnecting the cable.
- The pairing process for both 2.4GHz and Bluetooth modes is indicated by slow flashing lights (Bluetooth with F1-F3 flashing blue, and 2.4GHz mode with F4 flashing green). Once the connection is successful, the indicator lights will return to their normal backlight status.
- The Bluetooth/2.4GHz pairing search time is set to 1 minute. You can increase the Bluetooth/2.4GHz pairing time by long-pressing FN+F1/F2/F3/F4. If there is no successful connection within 1 minute of inactivity, the keyboard will enter sleep mode.

06 UNCS Q&A

- Q Why is my WIN key not working?**
- A** In the case of locking the WIN key by pressing FN+WIN, the WIN key cannot be triggered for use. To unlock it, simply press FN+WIN again.
- Q "Why have my WIN key and ALT key swapped, and my F1-F12 keys become non-responsive or turned into function keys?"**
- A** After long-pressing FN+M for 3 seconds, the keyboard will switch to MAC mode. In this mode, on a Windows system, the WIN key and ALT key will swap positions, and the F1-F12 keys will become function keys. To switch back to Windows mode, long-press FN+M for 3 seconds again.
- Q How can I customize keybindings and use macro functions?**
- A** You can download the latest driver and JSON files from the official website www.woblab.cn. You can use VIA to customize keybindings, edit macro functions, and experience the full functionality of the Rainy75 keyboard."
